

Protocol: PCR for inverted FlipROSAb-Geo(Cre)

Expected fragment sizes are as stated in table below.

	FlipROSA β -Geo (Cre)	FlipROSA β -Geo (Cre)	FlipROSA β -Geo (Cre)	FlipROSA β -Geo (Cre)
	\emptyset	Flpe	Cre	both
none	652	782	756	518
Flpe	782	598	518	702
Cre	756	518	572	702

FlipROSAb-Geo(Cre) Trap was inverted with Flpe and subsequently electroporated with Cre. The resulting fragments should have a size of 756 bp and 518 bp for the not reinverted and the reinverted trap, respectively.

Primer: B045

CTCCGCCTCCTCTTCCTCCATC B048
